

Maths Task - 2.04.2020

First task: Use some spare/scrap paper and cut it into small squares. On each square write a different number from 1-20. You then have your very own pack of number cards!

Second task: You will need your number cards and 20 objects (e.g. pencils). Pick 2 number cards and then add the 2 numbers together. Record these into your book

e.g. $2 + 12 = 14$

Remember: you can use the objects to help you add the numbers together.

Keep going until you have done 10.
