L.O: To subtract two 2 digit numbers

Please draw a bar model for 5a and 5b.

Example for a bar model based on $10 - 4 = 6$

10 (whole amount)	
6	4

5a. Write a calculation to match the image below.

5b. Write a calculation to match the image below.

6a. Use $>$, $<$ or $=$ to compare the number sentences below.

$$56 - 24 \quad \square \quad 78 - 54$$

$$68 - 37 \quad \square \quad 79 - 48$$

*Make sure you work out the answer to each subtraction problem, so that you know whether to use $<$, $>$ or $=$.
Draw your tens and ones to help.*

Solve the problem below:

6a. Anna and Jimmy are subtracting 47 from 98.

Anna

I think you partition 47 into 40 and 7. Then subtract 9 and 8.

I subtract 7 ones from 8 ones. I subtract 4 tens from 9 tens.

Jimmy

Whose method is correct? Prove it.
