

A Bit Stuck?

Hops, skips and jumps

Things you will need:

- A pencil

What to do:

- Choose at least four subtractions to work out.
Draw a line from the smaller number to the bigger number.
Use Frog to work out the difference between the two numbers.
- Remember to add up your hops and jumps at the end!

$$6000 - 5642$$

$$6002 - 6938$$

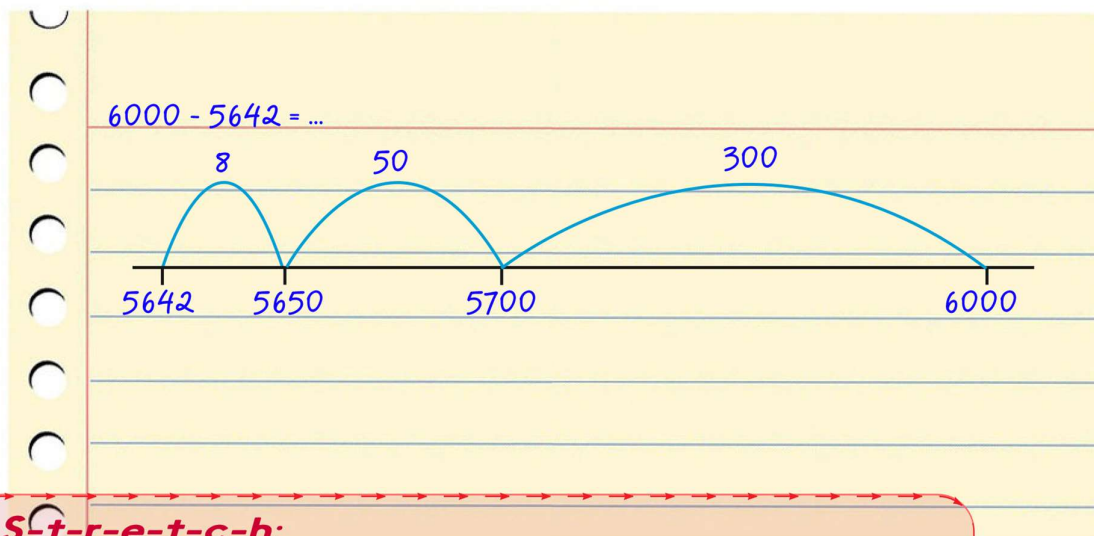

$$5000 - 3981$$

$$4005 - 3964$$

$$9000 - 4567$$

$$6001 - 4983$$

$$3004 - 2572$$

S-t-r-e-t-c-h:

Work out the answers to $6003 - 4579$ and $5010 - 3678$.
Frog needs to work a bit harder for these!

Learning outcomes:

- I can use Frog to subtract 4-digit numbers from multiples of 1000 (e.g. $4000 - 3786$).
- I can use Frog to subtract 4-digit numbers when the larger number has zeros (e.g. $4002 - 3987$).
- I am beginning to use Frog to subtract pairs of 4-digit numbers which are further apart from each other.
