

A Bit Stuck? Jump to Millennia

Things you will need:

- A pencil

What to do:

- Choose at least four subtractions to work out.
Draw a line from the smaller number to the bigger number.
Use Frog to work out the difference between the two numbers.
- Remember to add up your hops and jumps at the end!

$$6002 - 3948$$

$$7010 - 6937$$

$$5300 - 4965$$

$$4005 - 3971$$

$$9000 - 5672$$

$$6000 - 3583$$

$$8000 - 4548$$

S-t-r-e-t-c-h:

Write a subtraction where you would use Frog and a subtraction where you would use another method.

Learning outcomes:

- I can use Frog to subtract 4-digit numbers from multiples of 1000 (e.g. $4000 - 3786$).
- I can use Frog to subtract 4-digit numbers when the larger number has zeros (e.g. $4002 - 3987$, $4020 - 3987$, $4200 - 3987$).
- I am beginning to decide when to use Frog and when to use another mental method.
