

A Bit Stuck? It's freezing!

What to do:

- Mark 8°C and -2°C on the thermometer.
- What is the difference between the two temperatures?
- Your challenge is to find as many pairs of temperatures with a difference of 10°C as you can. BUT one temperature must be above 0°C and one below 0°C .
- How many can you find?

S-t-r-e-t-c-h:

Write some pairs of temperatures with a difference of 20°C .
