

Art Task - Thursday 4th June 2020

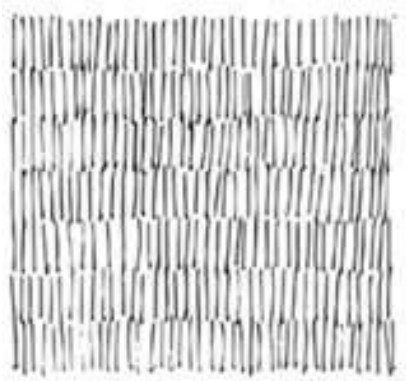

Over the next few weeks, we are going to be exploring an artist and creating our own observational drawings.

To start this unit, we are going to start by practising our sketching and trying to be as accurate as possible when creating a drawing. I want you to think about how you will create shading and different textures.

Today we are going to start by looking at shading, using a normal pencil only. I would like you to see how many different shades you can create with your pencil. What is the lightest line you can create? What is the darkest? Can you create 10 different shades?

Next, let's have a look at creating some texture using a normal pencil.

Copy the texture as closely as you can. Remember, take your time. This is about matching as best you can, not how fast you can finish.

Can you show some different textures? Have a look around your home for items which do not feel the same. Then have a try at drawing them. I know this can be tricky but have a go and see what you can create.

<i>What was your item?</i>	<i>Sketch the texture</i>
