L.O: To subtract two 2 digit numbers.

Spot the mistakes! Once you have worked out the mistakes, work out the answers and show your thinking on a number line.

6a. Abdul is using a number line to solve 83 – 54.

$- 50$ $- 4$ $- 3$

26   76   80   83

What mistake has he made?

6b. Romeo is using a number line to solve 74 – 38.

$- 30$ $- 4$

40   70   74

What mistake has he made?

Answers:

6a. Abdul has subtracted 7 ones. He should have only subtracted 4 ones. The correct answer should be 29.

6b. Romeo has not subtracted the 4 ones that makes up the other part of 8 ones. The correct answer should be 36.
