L.O: To solve word problems.

Show how you have worked out the answers and draw a bar model for each one.

If you have 67 slices of pizza and 15 slices are eaten, how many slices would you have left?

If you have 100 flowers and give 34 of them away, how many would you have left?

If you have 28 marbles and win another 29, how many marbles would you have?

If you have 49 pieces of chocolate and give 24 pieces away, how many pieces of chocolate do you have left?

The following questions have 2 steps to them. Look at the questions as if they are instructions. E.G:

Miss Blick had 19 sweets. She ate 5 and gave Mrs Revell 4, how many does she have left?

$19 - 5 = 14$ then $14 - 4 = 10$ or

$5 + 4 = 9$ (total amount that is being taken away) then $19 - 9 = 10$

Lydia has 15 marbles. She takes them to her friend's house. She loses 3 on the way and 4 in the house.

How many does she have left?

Amina collects 23 conkers. She gives 6 of the conkers to her brother and 8 to her sister.

How many conkers does she have left?

A teacher collects a bag of 28 balls for a PE lesson. There are 3 colours of ball. There are 13 blue balls and 8 green balls.

How many red balls are there?
