

## Art Task - Wednesday 24<sup>th</sup> June 2020

Over the past couple of weeks you have been practising your skills with shading and creating textures using normal and colouring pencils. Then you created a missing half image of a shell using these techniques.

Today you will be continuing to combine: shading, texture and looking closely at detail. I would like you to look at the image below of a beach. Your task today is to draw the picture as close to the original as possible. You will need to use colours in your drawing but remember you still need to create shades.
