Top Drawing Tips

Look Closer

Take a closer look at what you are drawing.

- Is it rough or smooth? Shiny or dull?
- What colours is the object made up of?
- What markings can you see?

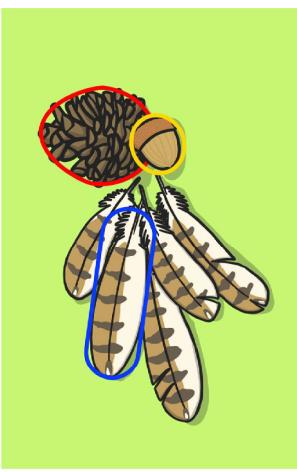

Try to include as much detail as possible!

Compare Sizes

Take a look at each part of the object.

- Which parts are small?
 - Which parts are large?
 - How do the sizes of each part compare?
- Try and draw the objects in proportion with each other.

Step Back

Take a look at the whole object.

- What is the overall shape?
 - Is it made up of different shapes?
 - Which details are the most important?
- Think about the perspective of the object.

Use Your Hands

If you can, pick up the object and feel it. Take care if it is fragile!

- What are the textures like?
- Is it rough or smooth?
- Is it hard or soft?

Think about how you might draw these textures.

Light and Shade

Look at the shadows on the object that you are drawing.

- Where is the light source?
- What shadows can you see?
- Which areas are light and which are dark?

Show the shadow and light to create contrast.

Frame It

Use a frame to decide which parts to draw.

- Do you want to draw the whole object or just one part?
 - Which parts are the most interesting?
- Use your frame to get a good composition.

Keep Looking

Look at your object and compare it to your drawing.

- Are the proportions correct?
 - Have you missed anything?
- Keep looking at the object to make sure your drawing is accurate.

Thick and Thin

Use thick and thin lines.

- Where are the edges of your object?
 - Are there any fine details that need thinner lines?
- Change the weight of your line to add form to your drawing.
