# Egg Box Flamingo

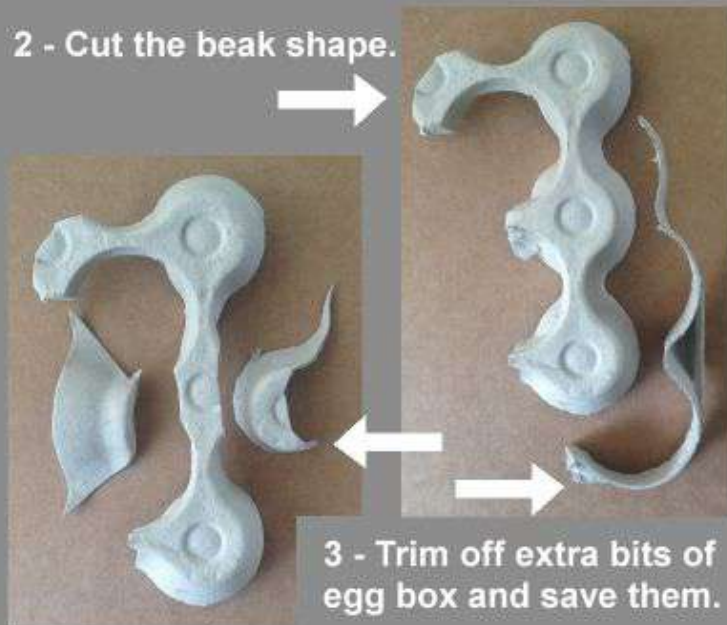

... instructions on next photo

1 - Carefully cut out this shape.

2 - Cut the beak shape.

3 - Trim off extra bits of egg box and save them.

4 - Attach this piece to a base leaving plenty of room for the long legs.

I have ripped and scratched the bottom of the card base to make it look like water ...

5 - Roll up a thin piece of tin foil or thin paper to make the legs ... add toes to the foot that is raised up but leave the other ...

6 - Use the extra pieces of egg box to build up the body.

7 - Roll up some more tin foil to make 'ripples' in the water ...

Now it's ready for you to add some colour.
