

Answer Sheet

Remember, (M) is written next to those questions you should have tried to solve mentally first. (W) means a written method is usually more efficient for this question.

1. $93,214 - 85,355 = 7,859$ (W)

2. $8 \times 3 \times 3 = 72$ (M)

3. $90 - 78 = 12$ (M)

4. $\frac{6}{7} + \frac{2}{7} = \frac{8}{7}$ *or* $1\frac{1}{7}$

5. $3,703 \div 7 = 529$ (W)
